Office Action Summary

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a method manufacturing a candy product, classified in class 426, subclass 420.
- II. Claims 4-14, drawn to a candy product, classified in class 426, subclass 115.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed in Group II can be made by methods other than that recited in Group I. For example, the product as claimed in Group II can be made without inserting a pin into the holder. The solid body of candy can be preformed and attached to the holder by any number of techniques such as screw threads, snap in, male/female elements, bonding, etc. Note too, that even if the candy is not preformed, the pin could be associated with the mold and not the holder.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication from the examiner should be directed to Steven Weinstein whose telephone number is (703) 308-0650. The examiner can generally be reached on Monday-Friday from 7:00 a.m. to 3:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on (703) 308-3959.
